

# Premium Vinyl Binders

**VIRIDIAM premium grade vinyl binders** are constructed from heavy gauge vinyl and extra rigid chipboard to resist wear for a longer, useful life. Choose from our wide selection of vinyl textures, finishes and production options. Vinyl binders are perfect for training manuals, human resource guides, project specification books, and more.

**We can save you time and money!**

No matter what your time frame or budget is, our sales team can tailor a project package to fit your requirements. We can supply the binder, tabs and insert pages. We can even do all the assembly work...your project just got easier!

**DID YOU KNOW?**

*To determine the size of a binder, you must measure the capacity of the ring, not the outside of the binder. See the back on how to measure the ring.*

**Materials**

Suedene or French calf vinyl, see back for features.

**Standard Sheet Sizes**

Letter: 11" x 8-1/2"  
Half Sheet: 8-1/2" x 5-1/2"  
Other sizes are available.

**Ring Options**

Round Ring and Angle D, see back for choices. Standard color is nickel. Other colors are available. Ring variations, locking, non-booster mechanisms and rivetless options are available.

**Production Options**

Silkscreen and foil stamp.  
Deboss or dimensional appliques.  
Foam padded exteriors.  
Inside pockets, business card holders, CD holders, sheet lifters and more.

*Your project just got easier!*

# Premium Vinyl Binders

## Screen Printing

Clean, accurate screen printing in your choice of Pantone colors that truly enhance your corporate identity. Four color process is also available.

## Sheet Lifters

Sheet Lifters are especially useful on all 1-1/2" and larger capacity binders. The sheet lifter easily moves the pages around the rings, allowing you to close the binder without damaging the inserted pages.

## Vinyl Pockets

We offer a wide range of vinyl business card holders, CD holders and pockets. Available in standard and custom sizes.

## Ring Mechanisms

Round ring or Angle D mechanisms. Mount on the spine or back cover. Both are available in rivet through or rivetless. Other ring styles are available.

## Foil Stamping

Foil stamping is a great way to give your binder a high-end look. Available in a multitude of colors. A die charge may apply on first time orders.

## Debossing

A great way to make your company logo stand out! One time die charges may apply. Special grade vinyls are required when debossing.

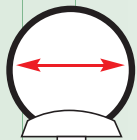

## Boosters

Loaded rings can be easily opened with boosters. Non-booster style mechanisms are available. Optional locking boosters prevent accidental opening, which is beneficial on larger capacity binders.

## Ring Styles and Capacities

All sheet capacities are based on 20 lb. bond.

To measure a round ring, measure the inside distance from the inside left and right.

To measure an Angle D ring, measure the inside angle distance from the bottom to the top of the ring's angle.

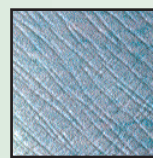

### Round Ring

Diameter	Sheet Capacity
1/2"	100
3/4"	150
1"	200
1-1/2"	300
2"	400
2-1/2"	500
3"	650

### Angle D Ring

Diameter	Sheet Capacity
1"	275
1-1/2"	400
2"	525
2-1/2"	650
3"	775
4"	1000

## Vinyl Textures

### French Calf

Smoother finish, best choice for fine detail printing. An array of color choices in dull and shiny are available.

### Suedene

Offers more of a textured feel for a modern appeal. Does not show finger prints. An array of color choices are available.

Your project just got easier!
